

Using the New Search Widget

The new RealtyTech Agent123 templates include an enhanced Search Widget which allows users to search for homes by entering an address, city, zip code, neighborhood, MLS Number and/or County.

Step 1

Access your new template website. At the top of the page, under the header, you will find the new Search Widget.

The screenshot shows a search widget titled "Find Your Perfect Home!" with a white arrow pointing to the search input field. The widget is overlaid on a background image of a two-story house with a tiled roof and arched windows. The search form includes a "Location" section with a text input field containing the placeholder "Enter one or more search terms separated by commas" and the instruction "Address, City, Zip, Neighborhood, MLS Number or County". Below this are three filter sections: "Price Range:" with "No Minimum" and "No Maximum" dropdowns, "Beds:" with a "No Preference" dropdown, and "Baths:" with a "No Preference" dropdown. At the bottom left is a link for "Advanced Search >>" and at the bottom right is an orange "Search" button with a magnifying glass icon.

Step 2

Add search criteria. If you add more than one search term they must be separated by commas for the search function to work correctly.

Example: Westlake Village, Ventura County, 91362

Step 3 - Optional

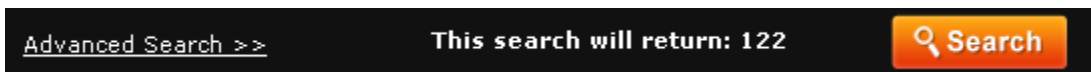

Specify "Price Range", "Beds" and "Baths". This is an optional step and is used to further narrow your search results.

This close-up shows the filter dropdowns from the search widget. The "Price Range:" section has "No Minimum" and "No Maximum" dropdowns. The "Beds:" section has a "No Preference" dropdown. The "Baths:" section has a "No Preference" dropdown. The "No Maximum" dropdown is highlighted with a yellow border.

Step 4

After inputting results the Search Widget will show how many results will be shown using your search criteria. This is helpful for determining whether the search criteria is too broad or too narrow. Simply adjust search criteria until it yields a favorable number of results then click "Search".

The screenshot shows a dark grey bar at the bottom of the search widget. On the left is a link for "Advanced Search >>". In the center, it says "This search will return: 122". On the right is an orange "Search" button with a magnifying glass icon.

Note: Use the "Advanced Search" to define even more specific search results
